

This exhibition will offer modern energy solutions

Mumbai: Did you know that residential areas contribute to 40% of total carbon emissions? On an average, a unit of electricity emits 1 kg of carbon dioxide. "Based on our electricity consumption, we can calculate the amount of carbon dioxide emitted," said Anjali Parasnis from TERI (The Energy and Resources Institute).

With the Copenhagen summit on and leaders firm in their resolutions, you might want to extend a helping hand to reduce your carbon footprints to fingerprints. In that case, a visit to this exhibition-cum-conference sessions on diverse issues concerning

environment could be a beginning. The three-day exhibition at Ravindra Natya Mandir will begin from December 18. It will be inaugurated by former president APJ Abdul Kalam. Titled Vishwa 2009, the event is organised by the Institute for Studies in Vedic Sciences, Solapur.

The event explores energy solutions in modern life and even the prospect of green nuclear energy. Some of the speakers include Almitra Patel, Harry Dhaul, Laxminarasimhan S from Tata Consultancy Services and Sanjeeb Arab from DTE Energy. —Sudeshna Chatterjee | TNN
